Re: Notice of Ex Parte – WC Docket No. 13-184
New Hope Technology Foundation

Dear Ms. Dortch:

On May 7, 2014, John Hughes III, President, New Hope Technology Foundation (“New Hope”) and Ray Spain, Superintendent, Warren County Schools, North Carolina (the “Superintendent”), along with Paul Besozzi and Koyulyn Miller of Patton Boggs LLP, counsel to New Hope, met with Amy Bender, legal advisor to Commissioner O’Rielly at the Federal Communications Commission (FCC), to discuss certain matters raised in the Commission’s E-Rate reform proceeding.¹

During the meeting, the New Hope representative and Superintendent discussed the importance of E-rate reform, expressing in particular concerns regarding: (1) the potential negative impact of eliminating support for legacy voice services, including cellular and Voice over Internet Protocol (“VoIP”); (2) the importance of predictable, focused funding for broadband deployment inside the schools; and (3) the need for permanent expansion of the fund to meet these important growing needs.

First, New Hope and the Superintendent explained that if support for cellular and VoIP, which are ongoing necessary services, were reduced or eliminated, the school districts’ abilities to match funds for other services would be affected, or other cost reductions (e.g., staff) would have to be made. Therefore, retention of—at a minimum—cellular and VoIP was essential.

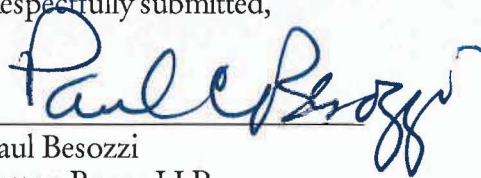

Second, New Hope and the Superintendent described the difficulties in planning and approving annual budgets without knowing with certainty the timing or level of funding support. Specific reference was made to the impact of the lack of support for internal connections in the last few years. In particular, the lack of any Priority 2 funding for Funding Year (“FY”) 2013 and likely FY 2014 was cited.

¹ *Modernizing the E-rate Program for Schools and Libraries*, Notice of Proposed Rulemaking, WC Docket No. 13-184, 28 FCC Rcd 11304 (2013); *Wireline Competition Bureau Seeks Focused Comment on E-rate Modernization*, Public Notice, DA 14-1308 (Wireline Comp. Bur. Mar. 6, 2014).

Third, New Hope and the Superintendent stressed the fact that to effectively meet the growing demands for broadband deployment in the schools, the size of fund must be permanently increased. By way of example, they noted the prospect of adjusting the fund for inflation going back to 1998 or shifting funds from other USF programs (e.g., Lifeline).

Both New Hope and the Superintendent urged that this input from, and on behalf of, school district managers living with the E-Rate Program on a daily basis be given strong consideration.

Respectfully submitted,

Paul Besozzi
